

## 超低温冷冻箱(柜)

设备制冷采用自复叠制冷技术原理，压缩机采用进口品牌，制冷单元采用自有知识产权的核心，油分采用99.9%以上的高效分离效果；控制阀体采用进口全封闭性阀体，焊接采用高银焊材焊接，确保制冷主机使用寿命，降低设备运行故障，减少设备运行维护成本。

超低温箱体一般采用风冷冷凝设计，大容积采用水冷冷凝设计，不锈钢内腔，温度分布均匀，开门可采用掀背式或立式开门方式，可采用液

压或气缸顶升辅助开门提高设备安全性；箱体底部可采用加强结构，高承重能力。箱体保温采用高密聚氨酯发泡，厚度可达 250mm，降低设备热损，提高设备能效。

箱体采用 SUS304 内胆、加厚保温层、柜体内部设置风道和不锈钢叶轮风扇，达到无霜要求，也可采用自然对流换热方式。使用温度范围：-60℃~150℃，设备广泛应用于生物、化工、血浆、疫苗、菌种、生物样本等低温保存。

设备主要应用于制药行业、科研院所等行业；

箱体可按业主需求容积、温度定制；

### **设备特点：**

- 1：采用自复叠制冷技制冷技术；设备体积减少。
- 2：采用本公司自主研发制冷单元，制冷剂无泄漏，延长设备使用年限；
- 3：采用原装进口压缩机，具有运行平稳，噪音低，功率小，能耗低，寿命长。
- 4：超低温度，降温平稳；
- 5：恒温采用热气平衡，节约能源；采用电热恒温，温度精度高；

- 6: 热交换通道、风机叶轮/内胆均采用食品级 SUS316 制作，满足行业需求要求；
- 7: 西门子 PLC+HMI/Deepcold 自开发控制板，施耐德电器；保障设备运行可靠性，运行状态一目了然；（选配）
- 8: 压缩机采用小功率，电源配置简单，适合研究所、医疗机构、院校方便使用；
- 9: 能定制防爆机型功能；

## **Ultralow Temperature Refrigerator (Freezer)**

This equipment applies the auto-cascade refrigerating technology and compressor of import brand. Refrigerating unit applies the core of independent intellectual property, and oil content applies high-efficiency separating effect above 99.9%; Control valve applies the imported closed valve with high-silver welding material for welding to ensure the life service of principal refrigerating machine, reduce the operation failure of equipment and decrease the operation maintenance cost of

Ultra low temperature refrigerator applies the forced-air cooling structure with stainless steel chamber to ensure an uniform temperature distribution. Refrigerator's door can be opened in both hatch-back mode and vertical mode, supported by the hydraulic or cylinder jacking system to enhance the safety of opening door; Refrigerator bottom applies the reinforced structure to ensure a high weight capacity. Refrigerator insulation applies the high density polyurethane foam with the thickness reaches 250mm to reduce the heat waste of equipment and enhance the energy efficiency of equipment.

Refrigerator applies SUS304 liner and thickened insulation layer with the air channel and stainless steel paddle-wheel

fan mounted inside so as to reach the frost-free requirement, which can also apply the mode of natural-convection heat transfer. Using temperature range:-60°C~150°C. It can be widely applicable to the low temperature storage for biology, chemical engineering, blood plasma, vaccine, bacteria, biological samples etc.

This equipment is mainly applied to the pharmaceutical industry, research institutes etc.

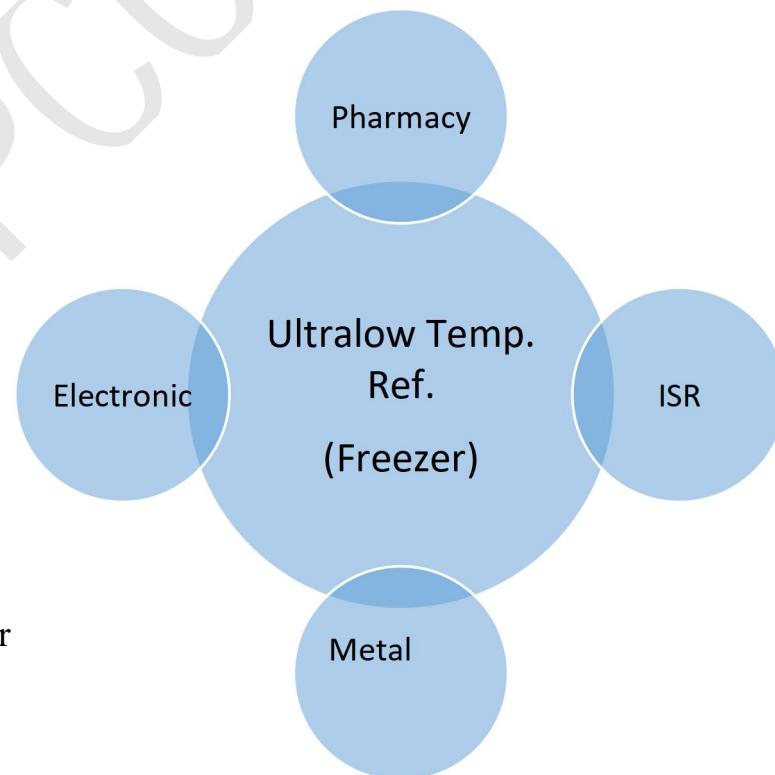

Refrigerator's capacity and temperature can be customized as per customers' demand.

### **Equipment Feature:**

- 1: It adopts ARC technology refrigeration technology; the equipment volume is reduced.
- 2: Self-overlapping uses the company's refrigeration units of its own research and development to extend the useful life of equipment
- 3: Adopting the original imported compressor with features of a smooth operation, low noise, low power, low energy consumption and long life.
- 4: Ultra-low temperature and stable and rapid cooling;
- 5 : Thermostat uses hot air balance with energy conservation; electric thermostat is used with high temperature accuracy;

- 6: Heat exchange channel, fan impeller / liner are made of food-grade SUS316 to meet the demands of industry;
- 7: Controlling system professionally developed by Siemens PLC+HMI or Deepcold , Schneider Electric to ensure the reliability of equipment operation;
- 8: Compressor has low power and power supply configuration is simple, which are suitable for research institutes, medical institutions and institutions;
- 9: It can customize the function of anti-explosion models

### **Applicable Industry Guide:**
